

Crosthwaite and Lyth Women's Institute

Question	Agree	Response
1 – Geology	No	according to independant scientific reports not enough is known as to future degradation of waste underground regarding gases water contamination and escape of radioactivity
2 – Safety, security, environment and planning	No	No comment was made
3 – Impacts	No	No comment was made
4 – Community benefits	No	No comment was made
5 – Design and engineering	Not Sure/ Partly	No comment was made
7 – Siting process	No	We have a high incidence of cancer in the surrounding locality, and feel that further future escape of radiation will be even more detrimental to health. We have already paid a high price, and continue to do so.
8 – Overall views on participation		They should not consider it, apparently it was refused in 1997, still independant research is not favourable.
