

Kirkbride Parish Council

Question	Response
Letter	<p>Geological Disposal of Radioactive Waste in West Cumbria – Consultation Response</p> <p>The information received to date has been considered carefully by Councillors, and discussed at the March Parish Council Meeting. The Parish Council acknowledges the importance of the nuclear industry to the economy of Cumbria, but is equally aware of the detrimental effects that a repository could have on the landscape, economy and other aspects of the immediate area.</p> <p>The Parish Council arrived at the view that it does not wish to object to the search for a repository at this stage of the process. The Council wishes to receive regular updates and reserves its right to object to the proposal at a later stage.</p>
