

**Whitehaven School Eco Group**

<b>Question</b>	<b>Agree</b>	<b>Response</b>
<b>1 – Geology</b>	Not Sure/ Partly	As the Sellafield facility is close by, we believe that for the security of the raw materials, these options would be most suitable.
<b>2 – Safety, security, environment and planning</b>	Yes	<ul style="list-style-type: none"> <li>• Because there's a risk of radiation leaks, but it could be good for the environment.</li> <li>• The repository site in America is already facing problems after decades of construction.</li> </ul>
<b>3 – Impacts</b>	Yes	<ul style="list-style-type: none"> <li>• Because it's going to create jobs for 10000 years.</li> <li>• Thousands of jobs will be created once this is constructed, Cumbria would have to rely on the next generation for thousands of years to keep the facility safe.</li> </ul>
<b>4 – Community benefits</b>	Yes	Because the package will supply Cumbria with the security to protect us
<b>5 – Design and engineering</b>	Yes	<ul style="list-style-type: none"> <li>• Because it's so far are underground so it's unaccessable for terrorists to use</li> <li>• The area is very well and catered for the waste at Sellafield.</li> </ul>
<b>7 – Siting process</b>	Yes	It will show the communities what the geology is like underground. The method will give us a better understanding about our natural landscape. The process is very time consuming.
<b>8 – Overall views on participation</b>		We believe that the councils should be committed towards this because this project will change the way Cumbria functions in the future.
<b>9 – Additional comments</b>		We at the eco group feel very compassionate about this project and hope for the possible success of its future.
